# ECHELON GOLD COIN - Token

This ETH token will be dropped to holders based on the ratio of C-Shox tokens they hold. They will be able to see it daily accumulating within the DApp but claimable once every end of the month.

To make this tokenomics sustainable, 2.5% from the 7.5% re-sale royalties will be provided as liquidity to thrive this ecosystem.

The EGC token will be used in the future to procure new released watch collections, custom made watches and etc products that are offered within the Echelon Cipher ecosystem.

# RENT - 2 - EARN

## Rent Your NFT!

Lenders **they can send the NFTs they want to rent, to a smart contract after determining the daily rental price and maximum rental period.**

Borrowers then enter how long they want to “own” the NFT, paying the cost of the rent plus a collateral amount equal to the price of the NFT, which they get back once the NFT is returned.
